

AGTV ART SHOW: CLARIFICATION ON ORIGINALITY

Our Art Show showcases unique artwork created by our members from their own original ideas. So while we welcome artwork from our many classes, we do not want artwork that isn't your own.

Here are some guidelines:

- If you copied the teacher's reference or composition, then it isn't your original idea.
- If you create a copy or replica of a famous or not-so-famous artist's work, that is not your original idea.
- Techniques learned in a class but with your own composition and ideas, is something unique and we would love to have you show it.
- Using a reference photo with permission of the photographer is allowed; using a copyrighted photo as a reference is not allowed.
- In collage, using a collection of images in different and unexpected ways is creating something new and we would love to have you show it.
- Using a pattern as a framework for your artwork is acceptable if you use techniques, color, or materials that make it fresh and different.
- Photographs entered must have been taken by the member. Photos MAY be digitally altered. The photo image must not infringe on any copyrights of third parties.
- Artwork created by AI is not acceptable.

Our goal is to display fresh and original artwork created by our members, and while we did sell over 50 pieces of artwork in 2022, we are not trying to be a marketplace or boutique. Our Art Show is a celebration of original art created right here in our community.
